

Restorative Non-Detergent Cleaner

- ✓ **Powerful** enough for restorative cleaning
- ✓ **Safer** for the chemically sensitive
- ✓ **Leaves no residue** to accelerate re-soiling
- ✓ **Reduce or eliminate** restorative cleanings
- ✓ **Cost Savings** include labor, chemical, water & electricity

Like all our cleaning products, **Split!™ Restorative Cleaner** contains no detergents, no enzymes, no oxidizing agents, no solvents or VOCs, and is very safe for use on any surface not harmed by water.

Stone Floors: With all detergents, thin layers of soap build up over time in stone and grout that holds onto soil and odors. **Split!™** Restorative will do what others can't – remove years worth of build-up on hard floors without harsh ingredients and with no fumes. And **Split!™** keeps them that way!

Bathrooms and Kitchens: Use **Split!™** Restorative on walls, countertops, sinks, fixtures, floor drains and more. Soils that cause old, unpleasant and lingering odors are removed and stay gone!

Stainless Steel: Stainless Steel doesn't hold fingerprints; the polish does! **Split!™** removes old polish and dirt, leaving elevators, drinking fountains, stall partitions, dispensers, etc. looking like new. And **Split!™** makes it possible to spot clean as needed; no more "all or nothing"!

Specialty Floors: Residue builds up quickly in the scratches, textures and seams of high performance, no-wax floors. It then becomes very difficult to clean and has an unsatisfactory appearance. **Split!™** Restorative breaks up the old residue and soil layers to reveal the original floor.

Wide Assortment of Soils and Stains: **Split!™** Restorative completely removes detergent residues, bio-film, odor causing organic soils, grease, oil, animal fat, food and beverage stains, carbon black, copy machine toner, printers ink, black shoe polish, pencil lead, lipstick, hairspray, make-up, mold stains, mildew stains, body fluids, body oils, body lotions, adhesive residue from tape, road tar, bug remnants on vehicles, and much more.

This product meets Green Seal Standard GS-37 based on effective performance, concentrated volume, minimized/recycled packaging and protective limits on: VOCs and human and environmental toxicity. www.GreenSeal.org
